Avinash Chetry

Data Scientist / Junior Developer

Github: <https://github.com/avinashchetry-cloud>
LinkedIn: <https://www.linkedin.com/in/avinash-chetry-45b4a7383/>

B.Tech Artificial Intelligence and Data Science student with hands-on experience in Data Science, Data Analytics, Machine Learning, and Application Development. Worked on projects involving data cleaning, exploratory data analysis, feature engineering, statistical analysis, data visualization, customer segmentation, predictive modeling, and recommendation systems using Python, Pandas, NumPy, Scikit-learn, SQL, and Tableau. Developed practical applications and ML-powered solutions using Flask, APIs, HTML, CSS, and JavaScript, including recommendation systems and data-driven applications. Experienced in building end-to-end projects from data preprocessing and model development to backend integration and deployment, with a strong focus on solving real-world problems through data and software.

Skills

- Tools and Languages: C, Python, Git, Linux, MySQL, JavaScript, Java, HTML/CSS, Tableau
- Additional Skills: Pandas, Numpy, Matplotlib, Seaborn, Scikit-Learn, NLTK, Scipy
- Other : Video Editing, Software Development

Languages

English (Fluent)
Hindi (Fluent)
Nepali (Proficient)

Project Summary

- Voice Assistant : [OasisInfobyte Task1 Repository](#)
- Weather App: [OasisInfobyte Task5 Repository](#)
- Resume Data Extractor: [Github Repository](#)
- BMI tracker: [Github Repository](#)
- Fake News Detection: [Github Repository](#)

Recent Work Experience

DecodeLabs Internship 2026/06/30— 2026/07/30 (Remote)

[Offer Letter](#) [Certificate](#)

Throughout this internship, I had the opportunity to work on real-world data science projects and strengthen my skills in data preprocessing, exploratory data analysis (EDA), feature engineering, machine learning, data visualization, and model evaluation. Working with practical datasets helped me understand how data-driven solutions can be applied to solve business problems.

CodeAlpha Internship 2026/07/20— 2026/08/20 (Remote)

[Offer Letter](#) [Certificate](#)

During this internship, I worked on practical Machine Learning tasks that helped me strengthen my understanding of:

- Data preprocessing and feature engineering
- Exploratory Data Analysis
- Machine Learning model building
- Model evaluation and performance analysis
- Working with real-world datasets

This experience gave me a better understanding of how Machine Learning concepts are applied beyond just theoretical learning and helped me improve my practical skills in Python and ML.

During this internship, I worked on multiple real-world data science projects, including Customer Churn Prediction, Fake News Detection, and Customer Segmentation using Machine Learning. This journey helped me strengthen my skills in Python, Data Analysis, Machine Learning, Feature Engineering, EDA, and Scikit-learn.

Thank you IncodeVision for this valuable learning experience. Looking forward to building more impactful AI & Data Science projects.

Educational Background

B.Tech(AI&DS Specialisation) JIMS (Greater noida)college expected year of graduate (2028)

1st Year

Promoted myself from Computer Science and Technology to Artificial Intelligence and Data Science branch after the completion of my 1st year with **CGPA of 7.48** and developed a strong understanding of C programming, problem-solving, and fundamental computer science concepts during the first year.

2nd Year

Completed my second year and achieved an **CGPA of 8.4**, while gaining hands-on knowledge in Machine Learning, Database Management Systems (DBMS), Computer Networks and Protocols, and Data Analysis through a Value-Added Course. These subjects helped me strengthen my technical foundation and develop a deeper understanding of data analysis, machine learning, databases, and networking concepts.

3rd Year

Currently, I am in my 3rd year, where I am expanding my technical knowledge in Data Mining, the Weka tool, Operating Systems, IoT Devices and Development, and Backend Development using technologies such as Node.js and MongoDB. These subjects are helping me build a stronger foundation in data science, software development, backend systems, and IoT technologies.

School (KVS RK Puram Sector-8 New Delhi)

10th Standard (2022)

Passed 10th Standard with **78 percentage**

Joined Red house community and participated in various activities and sports. Built a strong reputation among peers and teachers through sincerity, discipline, leadership, and academic performance.

12th Standard (2024)

Passed 12th Standard with **74.3 percentage**

Studied Python, MySQL, Cyber Security, Electromagnetism, Semiconductor Physics, Calculus, Statistics, Probability, and foundational Linear Algebra.
